

UPDATE: LOSS OF VENA ANSWERS AFTER “PREPARED STATEMENT” ERROR

BACKGROUND: This is an update about a problem that Montana reported to CSC during UAT. We found that the following error is sometimes reported while you are in VENA, and after the error occurs, you lose all of your VENA information. 🤔

GOOD NEWS! 😊👉 CSC has discovered what causes the problem and it is fixed in the next revision of M-SPIRIT (2.01, MT issue 16)!

CAUSE: Adding a risk while in VENA and then attempting to delete a risk while still in VENA.

WORKAROUND: Either don't assign risks in VENA until the new release or don't delete risks in VENA.
